acknowledges that the method of generating such dual-specificity antibodies by using an antigen comprising SEQ ID No 3 is enabled.

Notwithstanding Applicant's traverse, and without in any way acquiescing to the reasons for the present rejection, Applicants have amended claim 4 such that the antigen provided in the method comprises the amino acid sequence TKGGQQDITDFQILENQ (SEQ ID NO: 3). Applicants have canceled claims 9 and 10. These amendments are made solely to advance examination of the present application to allowance. This amendment is supported throughout the specification as filed, and no new matter is added. Applicants reserve the right to prosecute the original subject matter in a later-filed continuation application, which properly claims the benefit of this application.

In view of the foregoing remarks, Applicants respectfully request the withdrawal of the rejection to claims 1-4, 12-31 and 89-95 under 37 USC § 112, first paragraph.

Allowable Subject Matter

Applicants acknowledge Examiner's indication that Claim 10 would be allowable if rewritten in independent form including all limitations of the base claim and any intervening claims. The subject matter of claim 10, acknowledged by the Examiner as being allowable, is included in claim 4 as amended. Consequently, Applicants have canceled claim 10.

Conclusion

In view of the foregoing remarks, Applicants believe that all objections and rejections set forth in the Office Action of 02 August 2004 have been avoided or overcome, and consequently the application is in condition for allowance. Reconsideration and removal of the rejections, and allowance of the pending amended claims are, therefore, respectfully requested.

Respectfully submitted,
